

## Preventing the Spread of Pollution and Non-Native Invasive Species

Draycote Water Sailing Club expects its club members and visitors to follow the Check, Clean, Dry steps before launching at Draycote and when leaving Draycote to sail on another water to help stop the spread of invasive aquatic species.

The invasive species *Dikerogammarus Haemobaphes* has been found at Draycote Water.

In order to record that visiting boats are clean and do not contain polluting or environmentally harmful matter, we require all visiting owners / sailors to complete and sign the attached declaration.

**STOP THE SPREAD**  
**STOP THE SPREAD**  
**INVASIVE AQUATIC SPECIES**  
**CHECK-CLEAN-DRY**

Are you unknowingly spreading invasive species on your water sports equipment and clothing?

Invasive species can affect fish and other wildlife, restrict navigation, clog up propellers and be costly to manage. You can help protect the water sports you love by following three simple steps when you leave the water.

**CHECK** Check your equipment and clothing for live organisms - particular in areas that are damp or hard to inspect.

**CLEAN** Clean and wash all equipment, footwear and clothes thoroughly. Use hot water where possible. If you do come across any organisms, leave them at the water body where you found them.

**DRY** Dry all equipment and clothing - some species can live for many days in moist conditions. Make sure you don't transfer water elsewhere.
